EDUCATION

The Pennsylvania State University

Bachelor of Science in Computer Science

University Park, PA

Aug 2022 – May 2026

- Minor in Product Management and Design, Engineering Entrepreneurship
- **GPA: 3.87**

EXPERIENCE

Software Development Intern

Ernst and Young

June 2024 – Aug 2024

Gurugram, India

- Worked in a **scrum team**, developed full-stack **AI-based web applications** using **Flask**, integrating **computer vision**, **machine learning models** like transformers, **OCR**, and **natural language processing**
- Engineered **email summarizer** that effectively condensed large volumes of email chains, enhancing communication efficiency using **SQLite** database and performed **data validation**.
- Developed a **GAAP-based stock predictor** that increased **data processing accuracy by 30%** and reduced manual analysis workloads through **automation** and **predictive analytics**.

Software Development Intern

Unitru

June 2025 – Aug 2025

Remote

- Developed full-stack production features using **Node.js** and **PostgreSQL** in agile startup environment.
- Architected end-to-end solutions including **database schema design**, **API development**, and frontend integration, leveraging modern development tools for rapid prototyping and deployment.
- Applied **data modeling** techniques and **statistical analysis** for business intelligence solutions.

Snapchat Spectacles AR Fighting Game

Snapchat Spectacles Accelerator Program

Jan 2025 – Ongoing

Remote

- Secured \$35,000 in funding to develop immersive AR fighting game using Spectacles and Snap AR technology.
- Built and managed backend services in **TypeScript** for real-time game logic; integrated Unity (C), Lens Studio, and Snap AR SDK for gesture-based combat and multiplayer.

Teaching Assistant, COMPSC 131: Programming and Computation

Penn State College of EECS

Jan 2023 – May 2024

University Park, PA

- Led a team of 15 as the Lead TA, successfully executed a **research project** that yielded valuable insights through **statistical analysis**, graded assignments, and conducted extra lectures.
- Mentored over 750 students on programming assignments in **Python** and **Java**, Oracle, enhancing their coding skills and sharpening **problem-solving** and communication abilities.

PROJECTS

The Equal Edge: Technology-Driven Business Analytics Platform

Aug 2023 – Present

- Founded **data-driven business** with **AI-powered analytics platforms**, achieving 300+ client engagements.
- Developed **business intelligence dashboard** using **data visualization** tools to track **KPIs** and **revenue forecasting models**.

CropNsoil: An AI-based Multi-cropping Pattern Generator - *HackHarvard 2023*

February 2024

- Designed and initiated development at Hack Harvard 2023 to support struggling farmers in developing nations. Utilized **machine learning**, HTML, CSS, React, and **Python** to create AI-driven solutions.
- Focused on optimal inter cropping strategies using **predictive analytics** and **statistical modeling**.
- Recognized by winning 1st Prize and \$7,500 in the Ag Springboard Challenge by the College of Agriculture.

SKILLS

Programming: Python, Java, **SQL**, C/C++, JavaScript, **TypeScript**, HTML, CSS, **R PostgreSQL**, **MySQL**, **SQLite**, MongoDB, Microsoft **SQL Server**, Node.JS, React, Flask, **REST API**, Unix
Data Analytics & Visualization: Alteryx, **Power BI**, **Tableau**, Excel (Advanced)
Machine Learning & AI: Machine Learning, TensorFlow, **Predictive Analytics**, **Computer Vision**, **OCR**, **NLP**
